DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 1-2 and 4-6 are rejected under 35 U.S.C. 103(a) as being unpatentable over Bartosz et al. [US 5,573,411] in view of Fisher, Jr. et al. [US 5,490,801] and Wright et al. [US 4,614,398].

Regarding claims 1-2 are Bartosz et al. disclose an electrical unit [1] for use with a proximity switch [column 1, lines 10-15].

Bartosz et al. disclose the instant claimed invention except for the specific housing and terminal connection design for the proximity switch and an outer casing surrounding the housing and terminal connection assembly.

Fisher, Jr. et al. discloses a cable electrical unit [10] including a cable terminal part [100] having socket type terminals [figure 3] for receiving the cable mounted with an insulating connecting piece [34] and a housing part [104] for the component to be connected.

It would have been obvious to one of ordinary skill in the art at the time the invention was made to use the terminal/housing design of Fisher, Jr. et al. with the electrical unit of Bartosz et al. for the purpose of facilitating connection of the cable to the component to be connected.

Application/Control Number: 10/078,540

Art Unit: 2832

Wright et al. disclose a cable connection using an outer shell [32] surrounding a housing part and connecting piece using a catch type connection [figure 2].

It would have been obvious to one of ordinary skill in the art at the time the invention was made to use the outer casing design of Wright et al. with the electrical unit of Bartosz et al., for the purpose of securing the cable with the connection point.

Regarding claim 4, Wright et al. further disclose an end of the outer casing facing away from the switch having a smaller diameter than a portion of the casing facing the proximity switch [figure 2].

Regarding claim 5, Wright et al. further disclose the casing having a portion compressing the cable connection [figure 2].

Regarding claim 6, Bartosz et al. disclose the outer housing including a viewing hole for an led [figure 2].

Claim 3 is rejected under 35 U.S.C. 103(a) as being unpatentable over Bartosz et al., as modified, as applied to claim1 above, and further in view of Hill [US 3,990,765].

Bartosz et al. disclose the instant claimed invention except for the casing being tapered.

Hill discloses a cable connector assembly having a tapered outer casing [31, figure 3].

It would have been obvious to one of ordinary skill in the art at the time the invention was made to use the casing design of Hill for the casing of Bartosz et al., as modified, for the purpose of providing better engagement between the cable and connection assembly.

Response to Arguments

Applicant's arguments with respect to claims 1-6 have been considered but are moot in view of the new ground(s) of rejection.

Allowable Subject Matter

Claims 7-16 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Lincoln Donovan whose telephone number is (571) 272-1988. The examiner can normally be reached on M-F 8:30-5:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Elvin Enad can be reached on (571) 272-1990. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
